

How our process works

- Within 24 hours of the application being submitted, your client will receive a call to complete their TeleLife interview. At the beginning of the interview, your client will be prompted to provide HIPAA and CRA authorization.
- During the TeleLife interview, PLUS gathers the required data. Along with the application disclosures, PLUS uses the data to determine the underwriting requirements and the best available class for the applicant.
- Application package sent out for signature.
- At the end of the TeleLife interview, you can expect your client to follow one of these paths:

Accelerated underwriting: The need for exam and labs is eliminated, and the policy is ready to be issued.

Traditional underwriting: Exam, fluids, labs and/or medical records are required to ensure accurate underwriting.

Some clients may appear to be eligible for an accelerated underwriting offer, but will still be required to complete the exam and labs. The need for exam and labs could be from the underwriting data gathered (for example, prescription drug reports), a disclosure by the applicant, a combination of factors, or they could be randomly held out of accelerated underwriting by PLUS. Even if your client does not get an accelerated underwriting offer, they could still qualify for the best class through exam and labs underwriting.

Accelerated underwriting cases will be monitored post-issue to confirm the disclosures provided by the applicant. Information gathered via accelerated underwriting cases may be reviewed and addressed with your client if we discover any material differences.
